

a citation is Abrams (1987) (`\citet`), and with brackets (Vellend, 2010) (`\citep`), or no parentheses at all Lawton 1999 (`\citealt`). However, non-standard citation types are only allowed with natbib, which may cause problems with some bibliography styles. If your bibliography style is not compatible with natbib, but rather with plain latex, you have less options: just use `\cite{}`. A few journal bibliography styles can be found [here](#) , or [here](#), or [here](#)
